Intelliob SafeOver

A Web Content Filtering Software that offers organization a safe and protected internet experience for its workforce by controlled filtering & blocking of inappropriate, violent, adult and unwanted social media web content from website and online business portals.

SafeOver Benefits

- Prevent Loss of employee Productivity. Many a Organization incur huge loss in productivity due to employee activity on internet like social networking site, surfing on porn or adult and inappropriate site content during work hours.
- Enforcement of employment policies. Enforcement of employment policies that covers computer and internet usage rules and regulations is the responsibility of the organization to implement and monitor for any breach.
- Compliance to organizational legalities. Ensuring legal compliance across organization has been a major concern of many businesses and the need is to prevent and protect yours and customer's valuable data to become vulnerable when exposed to these inappropriate web sites and contents.
- Optimum use of available network bandwidth and performance. Because of the above activities there is an increase in downloads of related to these kind of contents which results in loss of valuable network bandwidth and performance.

Cloud Based

SafeOver is a cloud based hybrid Web Content Filter solution and changing settings of online management control panel will update all filtering applications connected to it as per new settings. This saves time and technicians don't have to go to every computer in the organization to apply the new filter settings.

Dynamic Categorization

SafeOver incorporates Web Categorization technology that is the only 4th Generation web and URL filter in the industry with providing the most comprehensive and accurate Global Database with real-time categorization engine, backend categorization engine, reputation data with analysis of malicious and compromised website.
